

Policy on Cheating and Other forms of Academic Dishonesty

ASET is strongly opposed to any form of academic dishonesty (e.g. cheating, plagiarism or fraud). Online course work is devalued when participants share test answers, work assignments, projects or forum discussion posts. Any incidence of cheating and/or any other form of academic dishonesty will be taken seriously and result in specific consequences, which may include removal from an online course, webinar or journal quiz without refund and withdraw of any related CEUs.
